

Brainport Eindhoven

Do you want to work or partner with renowned high tech companies or knowledge institutes?

Then you should consider Brainport Eindhoven: a world-class high-tech region with exceptional innovative strength, the world's highest patent density per capita, above average private R&D expenditure and number one in the world in research collaboration with the industry. The region's strength lies in areas like High Tech Systems and Materials, Food, Energy, Mobility and Safety and houses companies like Philips, Signify, ASML, NXP, Thermo Fisher Scientific, FujiSeal, Nyrstar, Schunk Group, TNO and Imec. High private R&D investments and close cooperation between large multinationals and hundreds of specialised SME's, in an informal and entrepreneurial manner, results in great achievements in a small geographical area.
